BURPEE'S NEW EXTRA EARLY AUSTRALIAN YELLOW GLOBE ONIONS.
"Just as they Grow."—one of the field piles in September,—engraved from a Photograph.

W. ATLEE BURPEE & Co.

Nos. 475 and 477 North Fifth St.
Nos. 476 and 478 York Avenue
PHILADELPHIA, PA.

FORDHOOK FARMS, BUCKS COUNTY, PA.

Terms of Credit.—To regular customers and well-known houses of established credit, all bills bought from this catalogue are due June 1st, without regard to date of purchase.

 Bills purchased on special quotations, made by letter, are due three months from date of invoice, or subject to a discount of one and a half per cent. for cash within ten days of date of invoice.

 Unknown correspondents desiring credit are requested to give satisfactory reference in Philadelphia or New York.

Cash Discount.—We allow a discount of **Five Per Cent.** on orders accompanied by a cash remittance, and also on all bills (at catalogue prices) paid within ten days from date of invoice.

The Prices Quoted are those ruling at this date. We expect to adhere to them until the issue of our January catalogue, except where important changes compel us to advance or reduce our prices, when we shall be governed by the market. **10 lbs. and more will be supplied at the rates per 100 lbs.;** $\frac{1}{2}$ lb and $\frac{1}{2}$ bush. at pound and bushel rates; but *smaller quantities will be charged at a higher rate.*

NO CHARGE for Packing or Cartage.—Bags and boxes are charged at *Cost.* After delivering to forwarders in **good order** (as shown by Bill of Lading) our responsibility ceases. **Insurance** will be effected only when so directed.

SEALED PACKAGES.—We make no charge for sealing **pounds, pecks, or bushels**, but, at the low bulk prices quoted therein, we shall charge for putting up in smaller sealed packages, when so ordered, as follows:

In Ounces.—One cent per ounce; 50 cts. per 100 ounces.

In Quarter-Pounds, Pints, and Quarts.—Two cents for each package.

In Two-Quarts and Four-Quarts.—A charge of three cents per package.

BURPEE'S SEEDS are sold in any quantity, but only under seal. They are always Genuine as dated,—if seal is unbroken.

BURPEE'S NEW
EXTRA EARLY
AUSTRALIAN
YELLOW GLOBE
ONION.

Burpee's New Extra Early AUSTRALIAN YELLOW GLOBE ONION

Six years ago one of our correspondents in Melbourne, Australia, reading the description of our *New Australian Brown Onion* in THE FARM ANNUAL, sent us for trial a sample of this fine onion, which he said was equally valued in that country. From the small crop of seed grown by us in this country we sent out samples to a number of our customers for advance trial during 1900.

The reports received, as well as repeated trials made at FORDHOOK FARMS, show that it is a fit companion to the *Australian Brown*, first introduced by us in 1897, and already so famous as the earliest and longest-keeping onion in cultivation.

The bulbs of this **NEW AUSTRALIAN YELLOW GLOBE** are globe-shaped,—see illustration from a photograph. The skin is a light brownish yellow, similar to the *Globe Danvers*, but a little lighter, while the bulbs are *slightly larger*. From their solidity they are heavier, a bushel weighing several pounds more than a bushel of American varieties,—an important feature where bulbs are sold by weight. An average onion measures about three inches in diameter each way, weighing about seven ounces. The onions are thin-necked and ripen evenly in all soils; the plants do not make any second growth. The flesh is pure white, very solid, and exceptionally mild in flavor. As the plants grow quickly, the bulbs mature *extra early*, and this in connection with their *exceptional keeping qualities* makes them profitable to plant for market. The **AUSTRALIAN YELLOW GLOBE** is truly remarkable in productiveness. Two customers, in competition for our prizes, reported a yield of two bushels of fine onions from a single small sample packet of seed, while another customer raised a bulb fifteen inches in circumference and twenty-one and a half

ounces in weight. Others stated that it produced "the finest onions they had ever grown in a single season from seed."

Per lb. 80 cts.; 10 lbs. or more at 75 cts. per lb.

Advance Prices.—for Merchants only.—of “The Best Seeds that Grow!”

This has been our motto for many years. It is not a mere advertising “catch phrase,” but represents the standard of the **BURPEE QUALITY IN SEEDS**. Growing seeds of the highest grade is not only our business but our pleasure as well. So careful are we of the reputation established by conscientious work for nearly thirty years, that we prefer to report “*sold out*” rather than to purchase any seeds of doubtful pedigree, with which to fill orders when our own stocks are exhausted.

Quality is our aim always. We never attempt to compete *merely in price*. It is quite true that **BURPEE'S SEEDS** cost more than the usual commercial grades,—but (and this is a great big BUT!) they are worth much more. Were not this the fact it would not have been possible for us to secure *the largest mail-order seed trade in the world!*

We are exclusively a catalogue house and never send out travelers to solicit orders, even at wholesale. Consequently there are several houses who supply a *greater bulk* of seeds at wholesale than do we, but we flatter ourselves that we retain *the exclusive trade* of many intelligent merchants throughout America who realize that, particularly in seeds, “the best is the cheapest.”

Shortages for 1904. It is a most remarkable coincidence that, owing to extremely unfavorable climatic conditions, the shortages in seed crops the past season have been upon the same lines as for the previous year. Cucumber, Squashes, and many Melons have produced only one-fourth of an average yield, as have also late varieties of Sweet Corn; early varieties of Sweet Corn have averaged from forty to seventy per cent. of a normal crop. All first-early Peas, except Alaskas, are extremely short, several varieties averaging only half a crop, while many long-podded late Peas are almost equally as short. Wax Beans bid fair to rule as high in price as last year, while of several green-podded Bush Beans there are not enough in sight to meet normal requirements. Tomatoes and Sweet Peas are also short, but not to such a distressing extent.

As usual, we shall aim to protect our regular customers, and have fixed prices in this **ADVANCE LIST** upon a moderate basis,—lower, in many instances, than we would accept for these scarce items alone. And yet, wherever possible, we will make special prices to merchants who favor us with a complete general order. In this connection it may not be amiss to allude to the fact that we continued to supply Sweet Corn at our catalogue prices (but necessarily in limited quantities) last season, when canners were freely offering more than double our wholesale prices!

We are not speculators but *bona fide* growers and dealers. We realize thoroughly that the only way to retain our wholesale trade is to treat merchant-customers *just as we should want to be treated* were the positions of buyer and seller reversed. Our adherence to this principle (together with the sterling quality of **BURPEE'S SEEDS**) has resulted in an annually increasing wholesale trade,—notwithstanding the fact that for five years we have been “exclusively a mail-order house” and have not had a single traveler on the road to solicit orders.

We try to make it to your own best interests to deal with us and, having no travelers, are always prompt to respond to requests for special quotations by mail or telegram.

**BURPEE'S SEEDS GROW and are famous
for the Uniform Excellence of their Products**

About Prices.

Did YOU ever stop to think that while BURPEE'S SEEDS cost a little more than usual commercial grades, they sell for considerably more at retail? They *cost us* more to produce and are worth much more to the planter. You can easily obtain the retail prices quoted in BURPEE'S FARM ANNUAL FOR 1904, which allow a good margin of profit, and you will have the satisfaction of knowing that your customers will obtain full value for their money,—that instead of complaints YOU will receive an increasing crop of future orders. Do YOU desire such a crop? If so, we shall be pleased to receive your orders and will serve you faithfully to the best of our ability.

One Price to All!

It ought to be unnecessary to say that we are *honest*! We do *not* make different prices on the same day, under the same conditions, to different customers! You are *safe* in sending us your order immediately upon receipt of this catalogue (without waiting to ask for any "special quotations"), and if the quantities ordered are sufficient to warrant lower prices, considering stocks in sight, *we will invoice such items at such lower prices.* Should the final results of the crops (after the seeds are cleaned and actually warehoused) justify us in making lower prices in our general wholesale catalogue,—to be issued in January,—you will be given the benefit of such reduction.

You Run No Risk.

therefore, in sending your orders **now** from this Advance List! You will probably save money by doing so, as doubtless we shall be compelled to advance prices of many varieties in January,—and perhaps before.

We are not in business for a day or a year, but for a lifetime (and, counting our successors, we hope for several lifetimes!); hence, as a mere matter of *policy*, it would pay us to treat our customers fairly and liberally.

This introduction to a wholesale catalogue may seem rather lengthy, but it does not occupy half the time that many a traveler consumes, and is intended to convince you that we are just as eager for your trade as if we had sent a traveler to solicit your orders—and *perhaps* we can serve you even *better*!

It will **pay to order early!**

Sincerely yours,

Wm. Burpee

Seed Gardens and Trial Grounds at Fordhook Farms, Bucks County, Penna.

BURPEE, PHILADELPHIA, {is sufficient address
for letters or telegrams

**BURPEE'S SEEDS are sold in
any quantity, but only under
seal. They are always Genuine
as dated,—if seal is unbroken.**

Telegraphic Cipher (or Cable Code)

FOR WEIGHTS AND MEASURES.

The telegraphic cipher word for quantities must always precede the cipher words for seed, but if the same quantity of several varieties is ordered, the cipher word meaning that quantity need be placed only before the first. For example:

Arad Navy, Purity, Benares, Calliope, Chalice, Malmo Balcony, would mean, ship at once, cheapest route, ten pounds each **NAVY BLUE** and **SADIE BURPEE SWEET PEAS** (white-seeded), twenty-five pounds each **BURPEE'S ALLHEAD EARLY CABBAGE** and **OXHEART CARROT**, and ten bushels **BURPEE'S STRINGLESS GREEN-POD BEANS**.

Our customers will find this a very inexpensive way of wiring their orders, but we must caution them that care be taken in writing out the messages, as we cannot hold ourselves responsible for errors arising from incomplete messages or incorrect translation.

IMPORTANT.—This telegraphic cipher must be used **ONLY** on orders by telegraph or cable, and never in written orders sent by mail.

Our Cable Address is **BURPEE, Philadelphia.**

Burpee's Vegetable Seeds.

TEN POUNDS OR MORE WILL BE CHARGED AT 100-POUND RATES.

 **A Telegraphic Cipher (or Cable Code)** is attached to each variety, by which orders can be wired at little expense,—using also our code for weights and measures as given on page 3. For example:

Darken Pelew Balcony would mean: Send immediately, by fast freight, forty bushels of BURPEE'S STRINGLESS GREEN-POD BEANS at catalogue price.

Dargie Arad Cage would mean: Send immediately, by express, ten pounds of best select JERSEY WAKEFIELD CABBAGE at catalogue price.

Darnel Amoy Lantern would mean: Send immediately, by mail, three pounds of seed of BIG BOSTON LETTUCE.

 **This list cancels all previous quotations.** Orders are binding only when accepted. On varieties which are in extremely short supply we shall refuse orders after we have sold quantities allowed for our wholesale trade.

 Those who depend on us each year for their supply of seeds are advised to place their orders early, before advances in prices become necessary.

Telegrams should be addressed,

W. ATLEE BURPEE & CO., Philadelphia.

Our Cable Address is: BURPEE, Philadelphia.

☞ Above prices are the lowest we dare make,—from present outlook. ☞ Should eastern Crops of SWEET CORN, when cured and shelled, turn out better than anticipated, so that we can make lower prices in our January List, we will give all who buy now full advantage of such reduction. ☞ As a matter of fact, we fear that the actual shortages this season will prove to be worse than last year,—and this promises to be true not alone of Sweet Corn! ☞ Even at prices quoted above, orders will be accepted only on a pro-rata basis,—subject to crop-deliveries as now figured,—October 17, 1903. ☞

☞ We shall be pleased to quote prices on Field and Pop Corn on application.

Golden Queen (Sunrise).	<i>Trident</i>	1 50	

By most careful continued selection we are enabled to offer strains of Tomato Seed which produce uniformly smooth fruits, of the most solidly fleshy character and fine quality. These strains have been developed, however, at the expense of the *quantity* of seed produced, and the price of this high-grade seed is necessarily higher than that at which inferior strains can be sold.

CHOICEST FLOWER SEEDS.

We make a specialty of the **Choicest Flower Seeds** which we grow extensively, both at FORDHOOK FARMS and with our private growers in America. We have **extra fine stocks**, particularly of ASTERS,—BALSAMS,—BEGONIAS,—COLEUS,—COSMOS,—GLOXINIAS,—Giant Hybrid HELIOTROPE,—Tall and Dwarf NASTURTIUMS,—Largest-flowering PETUNIAS,—PHLOX DRUMMONDII,—SALVIA SPLENDENS, and VERBENA.  We shall be pleased to quote **Special Prices** upon receipt of list of your requirements, stating varieties and quantities. Or you can send an **open order**, in full confidence that prices will be *very moderate* for quality of seed,—in no case higher than quoted in our last January catalogue.

Choice Strains of Tall Sweet Peas,—

Including all the desirable varieties—both new and old.

 **Special Low Prices.** 

We are acknowledged as **AMERICAN HEADQUARTERS** for Sweet Peas.

☞ We should refer to our Retail Catalogue for full descriptions of NOVELTIES not specially described herein, and should suggest that with the present widespread interest in Sweet Peas it will pay seedsmen generally to offer more of the **NEW SORTS**, as the margin of profit—between retail and these special prices—is greater than on standard varieties.

☞ We are not bound by these prices after December, and for quantities only so far as engaged. When our general Wholesale Catalogue is issued in January, probably many varieties will be advanced.

	Telegraph Code or Cipher.	Per lb.
* Admiration (Burpee's). Delicate shade of rosy lavender,	Admiration.	\$0 30

* Mrs. Jos. Chamberlain. Striped bright rose on white,	<i>Jinn</i>	20
Mrs. Sankey. Flowers white; seeds black,	<i>Jink</i>	18
* Navy Blue (Burpee's). Largest size; deep violet-blue,	<i>Navy</i>	25
Novelty. Standard bright orange-rose; wings light mauve,	<i>Jippo</i>	20
Oddity (Burpee's). Peculiar pale carmine and bright rose,	<i>Joar</i>	20
Orange Prince. Standard orange-salmon; wings bright pink,	<i>Jobation</i>	18
* Oregonia. Silvery-white ground, watered rosy carmine,	<i>Oregonia</i>	18
* Oriental (Burpee's). Suffused bright orange-salmon,	<i>Joblot</i>	18
* Othello. Deep glossy maroon,	<i>Othello</i>	24
Ovid. Rose-pink, margined with deeper rose,	<i>Jocantry</i>	20
Painted Lady. The old pink and white,	<i>Joconde</i>	18
Peach Blossom. Standard salmon-pink; wings soft pink,	<i>Jocose</i>	18
* Pink Friar (Burpee's). Carmine-rose, suffused on silvery white,	<i>Jocular</i>	20
Pink Snapdragon (Burpee's). A very pleasing pink shade,	<i>Jocund</i>	85
* Prima Donna. A most lovely shade of soft pink,	<i>Jogelour</i>	25
Primrose. Pale primrose-yellow,	<i>Jogge</i>	18
* Prince Edward of York. Standard scarlet; wings deep rose,	<i>Joinant</i>	20
* Prince of Wales. Bright rose; self-colored,	<i>Joiner</i>	22
Princess Beatrice. A popular rosy pink,	<i>Joist</i>	18
Princess May. Light lavender; flowers small,	<i>Jollyte</i>	20
* Princess of Wales. Striped mauve on white ground,	<i>Jolting</i>	18
Princess Victoria. Standard scarlet; wings rosy mauve,	<i>Jombre</i>	18
Purple Prince. Standard maroon; wings purple,	<i>Jonah</i>	18
Purple-Striped. Old and undesirable,	<i>Jondla</i>	18
Queen of England. Pure white; notched at top of standard,	<i>Jonesia</i>	20
Queen of the Isles. White stripes on bright crimson-scarlet,	<i>Jooming</i>	18
* Queen Victoria. Primrose, overlaid with faint purple,	<i>Joram</i>	18
* Ramona (Burpee's). White, daintily splashed with pale pink,	<i>Jostle</i>	18
Red Riding-Hood. Rosy pink; standard overlaps wings,	<i>Jotter</i>	18
Rising Sun. Orange and rose, shaded carmine,	<i>Jounce</i>	18
* Royal Robe. Standard delicate pink; wings blush-pink,	<i>Journal</i>	20
* Royal Rose. Deep rosy pink. (Per 100 lbs. \$20.00),	<i>Journey</i>	22
* Sadie Burpee,—Black-seeded (Eckford's). (100 lbs. \$22.50),	<i>Puritan</i>	25
* Sadie Burpee,—White seeded (Eckford's). (100 lbs. \$22.50),	<i>Purity</i>	25

The varieties marked with an asterisk () produce flowers of good substance and *largest size*—being of the true *grandiflora* type.

Apple Blossom,
Butterfly,
Duke of Clarence,

White,
Waverly,
Boreatton,

Captain of the Blues,
Bride of Niagara,

Senator,
Splendor.

Each of the above DOUBLE SWEET PEAS, 30 cts. per lb.

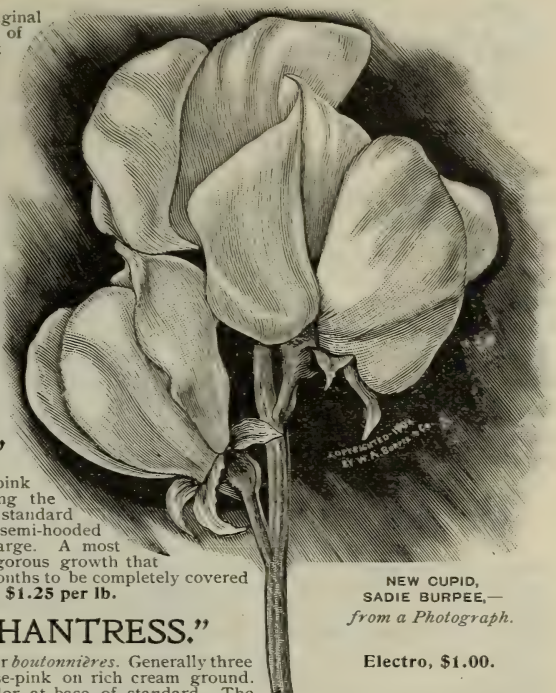

Ten Mixed DOUBLE SWEET PEAS (Cable word—*Xerxes*), 25 cts. per lb.; \$22.50 per 100 lbs.

Order Your Sweet Peas Early!

The Sweet Pea crop is short,—therefore you should place your order early (no matter from whom you buy) to be sure to obtain the varieties desired. The prices quoted above are exceedingly low and will hold good only until our general Wholesale Catalogue is issued in January. If you want the best in Sweet Peas you are safe in ordering BURPEE'S! We are recognized the world over as **Headquarters for SWEET PEAS.**

New Dwarf CUPID Sweet Pea,—SADIE BURPEE (b. s.)

This will completely eclipse the original *White Cupid*, and being *black-seeded* is of vigorous growth. The dwarf compact plants with their deep green foliage form a suitable background for the grand pure white flowers, which are gracefully hooded, of the best type and *truly enormous size*. The standard measures nearly two inches across while the wings spread out, but still touching measure two and a quarter inches,—giving the flowers an appearance of *really gigantic size*, never approached heretofore in any other Sweet Pea. The expanded flowers are uniformly of pure *pearly whiteness*; only the closed bud shows a light tinge of pink. Very often three of these gigantic flowers are borne on a stem; oftener two to stem, while occasionally only one on top of a stem, showing off the gigantic size to even better advantage. Wholesale, per lb. \$1.40; 10 lbs. or more at \$1.25 per lb.

New Cupid,— “BRIDESMAID.”

Standard and wings of a very deep pink throughout—almost self-colored,—retaining the rich pink to the edges of both standard and wings. The large standard is semi-hooded and the wings are unusually large. A most prolific bloomer, and of such vigorous growth that the dwarf plants continue for months to be completely covered with the large lovely flowers. Wholesale, \$1.25 per lb.

NEW CUPID,
SADIE BURPEE,—
from a Photograph.

Electro, \$1.00.

New Cupid,—“ENCHANTRESS.”

Most beautiful both for bedding and for *boutonnieres*. Generally three flowers on each stout stem; rose-pink on rich cream ground. The rose-pink is deepest in color at base of standard. The nearest counterpart in tall sweet peas is the *Hon. F. Bouverie*, but this new Cupid is even more beautiful; the flowers are *larger* and the pink is of a richer shade. Flowers of finest form; “they beat a Verbena for bedding.” Wholesale, \$1.25 per lb.

New Cupid,—“MAUVE QUEEN.” Of the true dwarf cupid growth, the profusion of magnificent large flowers. The flowers are practically self-colored, being deep pinkish-mauve upon primrose ground, with wings a shade lighter than the standard. Wholesale, \$1.25 per lb.

New Colors of BURPEE'S BUSH SWEET PEAS.

BURPEE'S NEW BUSH SWEET PEA.

Burpee's Bush Sweet Pea,—
“ROYAL ROSE.” The beautiful semi-hooded flowers are larger than usual in this distinct new type, while the plants, always of good bush habit, remain in bloom for a long time. Standard crimson-pink, shading deeper at mid-rib; wings pink, shading lighter at edges. Wholesale, \$1.25 per lb.

Burpee's Bush Sweet Pea,—
DOROTHY TENNANT. This is of very decided bush type, quite *self-supporting* when grown in a row. The flowers are self-colored, in handsome rose-purple; of medium large size, hooded form, of the best type. The plant is hardy and a profuse bloomer. Wholesale, \$1.25 per lb.

Burpee's Bush Sweet Pea,—
“LADY MARY CURRIE.” This is certainly one of the very best Bush Sweet Peas, blooming quite early and most profusely, while the flowers are of lasting substance and fine hooded form. The standard is bright crimson-orange; wings crimson, shaded with orange. There is a tinge of lilac at base of both standard and wings. Wholesale, \$1.25 per lb.

Burpee's Bush,—“LOTTIE ECKFORD.” Standard white ground, quite heavily shaded throughout with lilac; wings similar, but shaded with lighter lilac. Both standard and wings are *edged with deep blue*. Flowers of fine hooded form and extra large for the bush type, being nearly as large as the tall *Lottie Eckford*. While a *decided bush*, the plants are of vigorous growth, and the flowers are borne upon long strong stems. Wholesale, \$1.25 per lb.

BURPEE'S BUSH SWEET PEAS.

Bush Sweet Peas are very attractive if planted as a hedge, allowing about six inches for each plant. They branch freely, and each plant is of *perfect bush form* until about a foot high; when in full bloom they are 18 to 20 inches high and a row will still remain self-supporting. The flowers are about two-thirds the size of the Tall Sweet Peas, borne two on a stem; the stems are about six inches long. Cut in connection with some of the foliage, which consists of attractive narrow light-green leaves, the flowers are excellent for house decoration or bouquets. Their chief beauty, however, is seen when planted in a row, which, when in full bloom, is a *complete mass of flowers*.

Burpee's Dwarf CUPID SWEET PEAS.

A new and entirely distinct race of Sweet Peas, first introduced by us in 1895, differing as widely as possible from the usual tall vine-like growth, being of low very compact-spreading form. Plants are seldom more than six inches in height and form a dense mat of richest green foliage fifteen inches or more in diameter. The flowers are *fully equal in size* to those of the tall-growing varieties, but are placed closely together, generally three or four at the top of a stout stiff stem, seemingly poised just above the surface of the dark-green foliage. The stems branch freely with close joints, and are thickly set with dark-green leaves.

BURPEE'S FARM ANNUAL,—

Our Complete Illustrated Retail Catalogue.

New Tall Sweet Pea,—JANET SCOTT.

For a remarkable
New Extra Early
Variety,—
see page 33.

Burpee's
New Pink,
JANET SCOTT,—
from a Photograph.
Electro, \$1.50.

This might almost be called a *new shade* of deep pink with *Golden-Gate-shaped wings*. The unusual size of the wings in connection with the large, substantial, hooded standard give the flowers an appearance of enormous size. The flowers are considerably deeper and richer in color than the favorite *Katherine Tracy*, while unlike that variety they are generally borne three on a stem. We predict that JANET SCOTT, as a pure pink of unusual character, will create almost as favorable comment as has our new *Dainty*, described below. Wholesale, **\$1.50 per lb.**; 10 lbs. or more at **\$1.25 per lb.**

SUE EARL. This distinct new Sweet Pea was distributed for advance trial in 1902 under the letter **Q.** It is a cross of *Lottie Eckford* and *Mrs. Eckford*, but comes perfectly true and takes after both parents. The standard is primrose, with mauve at the edges; wings almost pure primrose, with only a suggestion of light mauve. The last blossom produced at top of stem *always remains of a clear primrose color*, while the other flowers become later of a *deep mauve*,—making a most charming contrast. The flowers are uniformly of large size and hooded form, borne three on a long stem. Wholesale, **per lb. 90 cts.**; 10 lbs. or more at **75 cts. per lb.**

“AMERICAN QUEEN.”

Of vigorous growth, bearing uniformly three large flowers on a long stem and most profuse in bloom. The standard is extra large, of unusual height, erect and pointed at top; color a clear “salmon-rose,” the large wings being of a bright deep rose. **Per lb. 45 cts.**; 10 lbs. or more at **40 cts. per lb.**

“**Pink Butterfly**” is the name suggested by one of the leading English growers who visited FORDHOOK last September. He said that visitors to his firm's trial grounds in England would enthuse when they came to this row of our new “*White with Pink Edge*” and exclaim, “*Why, here you have a Pink Butterfly!*” We decided, however, that *DAINTY* was an even more appropriate name,—see description below.

Burpee's “Dainty.” Sent out for advance trials as “*White with Pink Edge*,” this unique new Sweet Pea has created quite a *furor* in England as well as in America. Flowers are of the largest size and splendid substance, while they are borne three and four, set well at the end of long stout stems. So vigorous in growth and profuse in bloom are the vines that many of the flowers come with a double standard. The beautifully formed flowers, upon first opening, appear to be white, but quickly change to “*white with pink edge*,”—making a most charming contrast,—there is more pink on edges of standard than on edges of wings. *Sold only in sealed packets, each containing about twenty seeds. Seed very scarce.* **Per 100 pkts. \$7.50**; 500 pkts. at **\$6.00 per 100 pkts.**

EDGAR A. HIGGINS, of Avoca, the well-known New York Sweet Pea expert, September 29, 1902, writes:—“The splendid flowers are *very large, strikingly beautiful*, and gracefully set on long stout stems. The color is a pure white, with the edge of the petals daintily tinted with exquisite pink. I exhibited a vase of specimen blossoms at the Floral Exhibitions at Cohocton, Hammondsport, Avoca, and Springville, N. Y., where it was enthusiastically admired by hundreds, and at each place it was honored by the judge giving it a “**SPECIAL AWARD OF EXCEPTIONAL MERIT**,”—a distinction that all conceded it richly merited.

Burpee's “Golden-Rose.” Received Award of Merit from the National Sweet Pea Society of England, when exhibited at The Royal Aquarium, London, in July, 1902. This is an *exceptional honor*,—which was conferred upon only one other Sweet Pea—a new variety of Mr. Eckford's. Burpee's new **GOLDEN-ROSE** is one of the most attractive and distinct Tall Sweet Peas that we have ever had the pleasure of presenting. The flowers are *extra large* in size, of fine open form, with the standard gracefully fluted. The ground color is a clear primrose-yellow, beautifully flushed with rosy pink—making a color combination hitherto unknown, and which is most attractive. **Per lb. 75 cts.**; 10 lbs. or more at **65 cts. per lb.**

Burpee's “Majestic.” Borne almost uniformly three on a stem, and all facing one way, the flowers are of largest size and perfect form, slightly hooded. They are practically a self-color; standard is a deep rose-pink, while wings are also deep rose, but rather softer in tone. **Per lb. 30 cts.**; per 100 lbs. **\$27.50.**

Burpee's WHITE WONDER.

This is the Double-stemmed Many-flowered White Sweet Pea distributed at retail only as *New Nameless*, for advance trials the past season. It is now first offered to the trade and is pronounced the most unique novelty in large-flowering Tall Sweet Peas yet produced! Some idea of its remarkable character may be obtained from the illustration, which has been engraved from a photograph.

The flowers are pure white, uniformly of the largest size, and are borne six to eight and frequently as many as ten to twelve large flowers on a long stout stem. The stems are frequently double; that is, two stems seem to be united in growth throughout their entire length. The flowers are well placed near top of stem and generally all facing one way. The vines are most profuse in bloom, being of unusual vigor, as is shown from the fact that about half the flowers have double standards.

Wholesale, \$2.50 per lb.; in lots of 10 lbs. or more at \$2.25 per lb.

Burpee's Earliest

"SUNBEAMS" is a companion to Burpee's "Earliest of All" — Re-selected—"Extreme-Early." A beautiful rich primrose color. Now first introduced, it is described on page 33.

BURPEE'S
WHITE WONDER.—
*Engraved from a
Photograph.*

Electro, \$1.50.

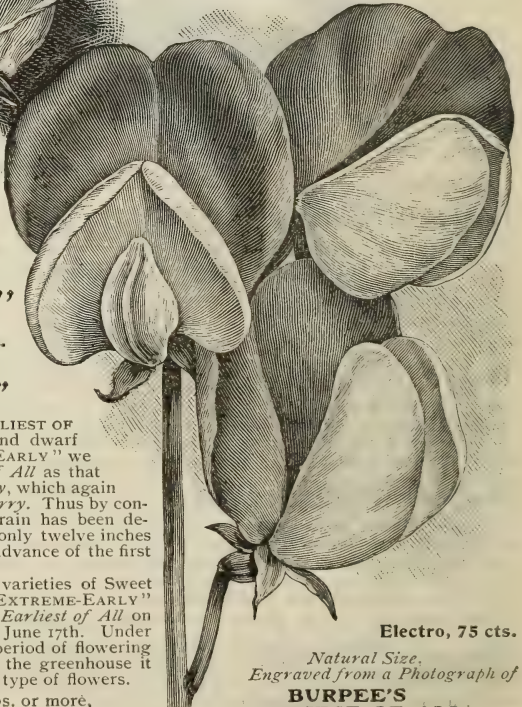

Burpee's "Earliest of All" Sweet Pea.

Re-selected,—*"Extreme-Early."*

Mr. Gould, the originator of BURPEE'S EARLIEST OF ALL, has continued to develop the earliness and dwarf habit, until in this RE-SELECTED "EXTREME-EARLY" we have a strain as much earlier than *Earliest of All* as that variety is ahead of *Extra Early Blanche Ferry*, which again is earlier than the original *Blanche Ferry*. Thus by constant and intelligent selection this strain has been developed to come into full flower when only twelve inches in height and three to four weeks in advance of the first parent variety.

In our Trial Grounds, where the standard varieties of Sweet Peas all came into flower quite early, this "EXTREME-EARLY" was in bloom on June 3d, the regular strain of *Earliest of All* on June 9th, and *Extra Early Blanche Ferry* on June 17th. Under less favorable conditions the difference in the period of flowering is even more marked. For winter flowering in the greenhouse it is the very best of the popular pink-and-white type of flowers.

Wholesale, per lb. 85 cts.; in lots of 10 lbs. or more, per lb. 75 cts.

Electro, 75 cts.

Natural Size.
Engraved from a Photograph of
**BURPEE'S
EARLIEST OF ALL.**

Choice New Sweet Peas.

Coccinea. *A distinct new color and "a beautiful thing."*—although the flowers come only two on a stem and are not extra large. They are self-colored in a *bright rich cherry*, intensely brilliant and decidedly new. **Per lb. 30 cts.; \$27.50 per 100 lbs.**

George Gordon. *"Bright reddish crimson-lake standard; wings brilliant rosy purple; a massive flower, stout and erect."* **Per lb. 30 cts.; \$27.50 per 100 lbs.**

Gracie Greenwood. *"Beautiful soft cream, shaded delicate pink with a distinct edging of deeper pink."* **Per lb. 70 cts.**

Jeanie Gordon. *"This charming novelty is one of the most attractive varieties sent out for some years; the standards are of a bright rose color, shaded cream, slightly hooded wings, creamy suffused rose."* Large flowers; similar to the beautiful *Crown Jewel*, but on a *cream ground*. **Per lb. 70 cts.; 10 lbs. or more at 65 cts. per lb.**

Lady M. Ormsby-Gore. Standard primrose, delicately shaded (or overlaid) with buff and fawn; wings clear primrose. It is almost a *Queen Victoria*, except for color of standard, while it surpasses our popular *Stella Morse*. Of very vigorous growth, the large hooded flowers are borne profusely upon large stems. **Per lb. 30 cts.; \$27.50 per 100 lbs.**

Lord Roseberry. *"A self-colored rosy magenta, of fine form and substance, very free flowering and robust."* We are much pleased with this richly colored variety. The large hooded flowers, borne on long stems, are of a *rose-carmine*, showing veins of deeper rose. **Per lb. 75 cts.; 10 lbs. or more at 65 cts. per lb.**

Miss Willmott. The extra large standard measures *one and one-fifth to one and three-quarter inches across*, and is of the richest orange-pink, delicately shaded rose; wings also orange-pink. The enormous flowers are borne erect upon stiff stems from twelve to sixteen inches long. One of Eckford's finest novelties, and is superior both in size and richness of coloring to the popular *Lady Mary Eckford*. **Per lb. 35 cts.; \$30.00 per 100 lbs.**

The Hon. Mrs. E. Kenyon. *Certificate Horticultural Society. "A beautiful primrose color, deeper than any other in that shade; a bold giant flower and a most desirable variety."* This is really very fine and can be described briefly as an *enlarged and improved Mrs. Eckford*. **Per lb. 30 cts.; \$25.00 per 100 lbs.**

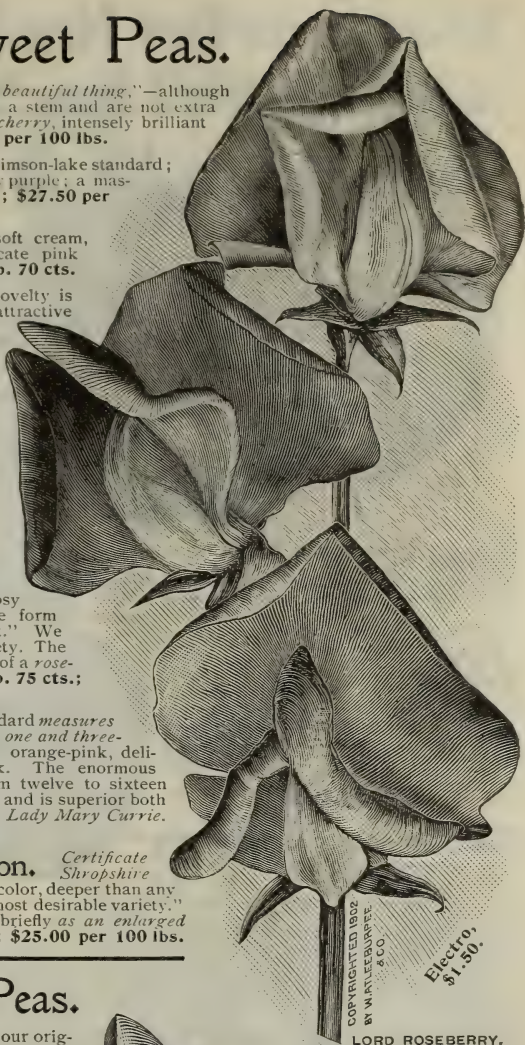

Curious New Sweet Peas.

White Snapdragon. This is like our original curious "Snapdragon," except that the flowers are *snow-white* throughout. These bud-like flowers, borne profusely three and four on a stem, combine finely with other flowers (*not Sweet Peas*) for bouquets. Used in this manner they always excite remark and are sure to become popular. Wholesale, **70 cts. per lb.; 10 lbs. or more at 65 cts. per lb.**

Pink Snapdragon. Like the preceding, but the flowers are of a *lovely soft shell-pink*, and frequently borne five flowers on a stem. Very pretty for a buttonhole bouquet. Wholesale, **85 cts. per lb.**

Burpee's "SNAPDRAGONS," Mixed. This new mixture contains *five colors* (including one not yet introduced separately) of the curiously formed and deliciously fragrant "Snapdragon" Sweet Peas. Besides their *unique beauty* in bouquets of assorted flowers, these "Snapdragons" are superior to the regular sweet peas for *boutonnieres*. **Per lb. 70 cts.; 10 lbs. at 60 cts. per lb.**

"Salvation Lassie." This is an entirely new departure in Sweet Peas. The standard is unusually wide and well expanded, yet curving so curiously over the wings as to suggest a *Salvation Lassie's Bonnet*. In color a soft shade of deep rose throughout. The flowers are of large size, borne profusely on stiff stems and generally *four flowers on a stem*. Wholesale, **85 cts. per lb.**

Electro,
\$1.50.

Several of the Best New NASTURTIIUMS.

Electro.
\$1.00.

CAPRICE.

Burpee's "CAPRICE." "CAPRICE" bears most profusely flowers of *extra large size* and in a wonderful variety of colors and markings. The petals are heavily marbled or overlaid with deep velvety tints,—showing many unique combinations. It is appropriately named "CAPRICE" from its character of frequently bearing flowers of diverse colors upon a single plant.

In this respect it is similar to the popular *French Chameleon Nasturtiums*, but the flowers are *very much larger in size*. The large foliage is generally of a deep dark green, and the plants are always of strong and vigorous growth.

While a tall or climbing variety, the new "CAPRICE" is *equally beautiful grown simply trailing upon the ground*. Wholesale, **per lb. 80 cts.**; 10 lbs. or more at **70 cts. per lb.**

Electro.
90 cts.

COP-WEIGHTED 1890
BY W. ATTLIE BURPEE & CO.
BUTTERFLY.

Burpee's "BUTTERFLY." The flowers are very large, measuring three inches across, and the petals have a similar *crape-like texture* to those of *Sunlight*. The color is a light lemon-yellow, showily marked on the three broad lower petals with a blotch of rich *terra cotta red*. The petals are deeply fringed at the edges of the throat. The two upper petals are beautifully marked in a manner strongly resembling the eye of a peacock's feather in shades of bright red, with fine dark lines radiating through them from the throat. The tall plants are of handsome light-green foliage and wonderfully profuse in flowering.

Wholesale, **90 cts. per lb.**

Tall Nasturtium,—“JUPITER.”

This variety from California is of strong running growth and bears large rich golden-yellow flowers of the finest form. The petals are of a thick silky texture, crumpled like *crape*, and where the three lower petals join the throat they are surmounted by a heavy fringe of fine golden hairs. While we have had a sample in our Trial Grounds at FORDHOOK FARMS the past two seasons and consider it one of the finest of the new large-flowering type, we were unable to discover any marked distinction between the *New Jupiter* and *Burpee's Sunlight*, but offer seed grown from the originator's stock. **Per lb. 70 cts.**; 10 lbs. at **60 cts. per lb.**

Nasturtium,—Burpee's "Twilight." Plants of strong running growth and great freedom of bloom. The flowers are *extra large* and of full expanded form. They are most pleasing in color, having a faint salmon or buff tint heavily suffused with a rosy salmon. The throat is large and open; the three upper petals are beautifully veined with crimson. The colored plate shown in the FARM ANNUAL for 1903 gives but a faint idea of its distinct beauty. This grand novelty comes quite true from seed and is of the same important large-flowered type as our popular *Sunlight*. **Per lb. 85 cts.**; 10 lbs. or more at **75 cts. per lb.**

Nasturtium,—“Midnight.” Plants of extremely deep dark green foliage, and bear an abundance of bloom of *wonderfully rich coloring*,—the darkest of all nasturtiums. The flowers are a deep brownish red or crimson, the soft velvety texture of the petals being crumpled or partially folded, giving the effect of even darker shadings. The two upper petals are finely penciled with crimson and there is a small blotch of crimson at the throat. The calyx and spur are deep orange-yellow, contrasting finely. **Per lb. 75 cts.**

New Tall Nasturtium,—“Croesus.” Of strong vigorous growth, with heavy foliage of a medium green, the plants bear magnificent large flowers in rich profusion. It is equally beautiful either as a climbing vine or grown in a continuous row simply trailing upon the ground. The ground color ranges from light primrose and lemon-yellow to deep orange. The two upper petals are blotched with velvety crimson, and the throat portion is lined with the same rich shade; the three lower petals are heavily fringed or “toothed” at the throat and each marked with small blotches of bright brown-red. Other flowers in the deep yellow and rich orange shades have the same markings in bright carmine or in salmon-red, and in these richer hued flowers the colored markings are frequently suffused over nearly the entire surface of the petals. The originator pronounces it “the *finest thing we have ever had in Nasturtiums*,” and says that while first similar to our *Butterfly*, later the flowers become suffused like *Twilight*, and he has frequently seen not only these two colors, but also flowers of an almost solid deeper coloring upon the same plant. **Per lb. \$1.00.**

New Extra-Early Sweet Pea,— Burpee's Earliest SUNBEAMS.

The Most Important Novelty in Sweet Peas.

(CABLE WORD,—*Sunbeams.*)

Burpee's Sunbeams

might be described as a *primrose Mont Blanc*! This one statement will make it eagerly sought for by commercial florists, as with the famous *Burpee's Earliest of All* it now gives a third color in this distinct class of extreme-early Sweet Peas for forcing. It is equally desirable also for early spring flowering in the open ground, particularly in sections where the later sorts are apt to be cut off by extreme summer heat.

The flowers are of good size, fine substance, and are well formed. They are of a *rich primrose color*, and generally borne three on a stem; stems strong and of good length for cutting. The plant is comparatively dwarf growing,—exactly of same habit as *Mont Blanc*, of which it is a duplicate except in color. This new color, coming into market at the same time as the first pure white and “pink and white” Sweet Peas (either grown under glass or in the open ground), will find a ready sale and make money for florists who are so fortunate as to offer first *these beautiful primrose Sweet Peas*. It will prove, of course, equally as popular in private gardens, to furnish a third color,—at least two weeks before the general list of *Sweet Peas* come into bloom.

Sold only in sealed packets,—but if desired our firm name and address will be omitted from the packets and on orders of 500 pkts. or more any other name printed thereon. Per pkt. 25 cts.; 5 pkts. for \$1.00,—each packet containing forty seeds. Wholesale, \$1.50 per dozen pkts.; \$10.00 per 100 pkts.; in lots of 500 pkts., at \$8.00 per 100 pkts.

Half-size pkts., 15 cts. each: these contain twenty seeds each and are supplied to the trade at 90 cts. per dozen; \$6.00 per 100 pkts.; in lots of 500 pkts., at \$5.00 per 100 pkts.

An Electrotpe

of a spray is now being prepared and will be supplied to houses (who catalogue this novelty) at the nominal price of 75 cts.

You should Catalogue SPARKS' EARLIANA Tomato,— Most Famous of All “Extreme-Early” Tomatoes.

It was developed in Southern New Jersey, where the greatest competition exists among growers to be first in the market. MR. GEORGE C. SPARKS, of Salem Co., has been most successful, and the seed we offer is from selected stock of his *choicest extreme-early free-fruited strain*.

In the accompanying illustration our artist has attempted to show its *wonderfully prolific character* and habit of growth, as far as possible, in the small space.

The plants are quite hardy with rather slender open branches and moderate growth well set with fruits, nearly all of which ripen extremely early in the season. The tomatoes are deep scarlet and grow closely in clusters of five to eight, all of medium size, averaging two and a half inches in diameter; they are smooth and solid, quite thick through and free from rough ribs or cracks. The flesh is deep red, with solid center and small seed cells, slightly acid flavor.

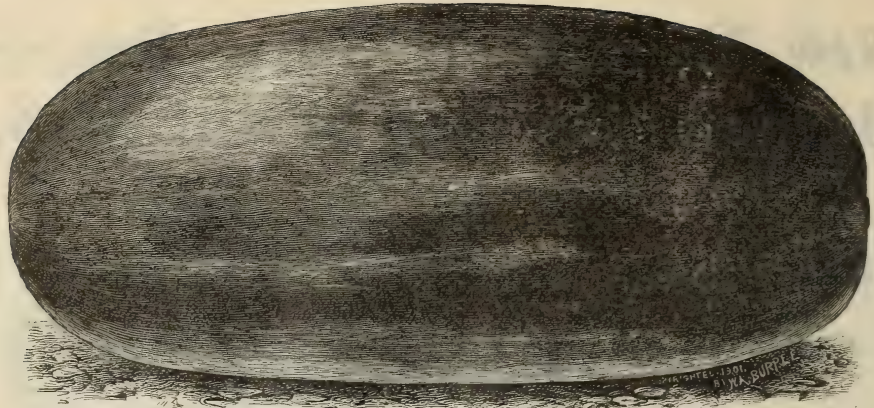

Wholesale, per lb. \$4.00; 10 lbs; at \$3.50 per lb.

Write for special prices in larger quantities.

ELECTROTYPES: Conditions of Sale.

Note. We do not, as a rule, sell electrotypes, and these electrotypes are sold only to those who purchase their supplies from us, and with the distinct understanding that they shall be used to illustrate only the varieties for which they have been engraved.

BURPEE'S NEW "HALBERT HONEY" WATERMELON,—from a Photograph.

Electro, \$1.25.

Burpee's "Halbert Honey" Watermelon

For several years we have considered the *Kleckley Sweets* as our finest watermelon for quality, but in the new HALBERT HONEY we have one which *fully equals the Kleckley in sweet flavor* and has fruits more even and regular in outline, with a darker richer colored skin, making it *more attractive in appearance*.

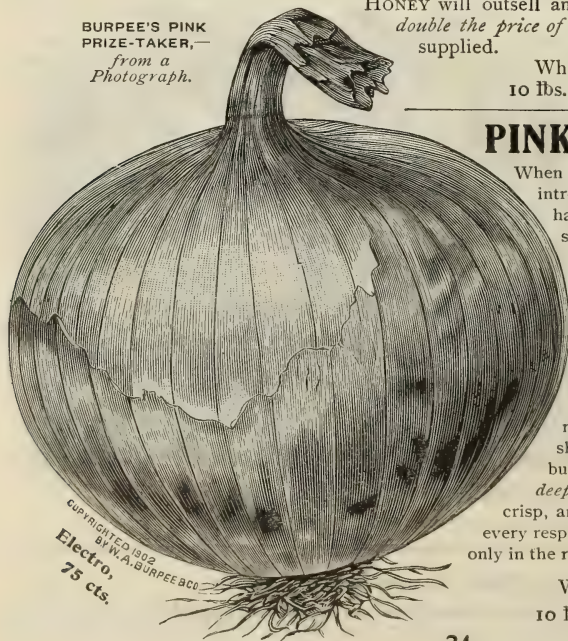

The vines are of strong vigorous growth and set fruits very freely,—four or five fine large melons are frequently seen clustered closely together. The vines grow quickly, so that they *will ripen choice fruits even in the Northern States* if planted in a good location; further south, two plantings may be made,—one for summer and another for fall use. The melons average eighteen to twenty inches long and are full or bluntly rounded at both ends. The skin is a dark glossy green; the rind white and less than half an inch thick in a fully ripened melon. The flesh is a beautiful crimson, the rich coloring extending to a clearly defined line where it joins the thin white rind. The seed is white and comparatively small.

THE HALBERT HONEY is essentially a home melon or for a nearby market, as the thin skin is so brittle that it will not withstand rough handling or shipping to any distance; in cutting a ripened fruit the rind will split ahead of the knife after the first thrust has been made. A great many planters who sell their melons from the wagon in nearby markets have written us that THE HALBERT

HONEY will outsell any other variety, and *frequently brings double the price of other sorts* when the markets are well supplied.

BURPEE'S PINK PRIZE-TAKER,
from a
Photograph.

Wholesale, \$1.00 per lb.;

10 lbs. or more at 90 cts. per lb.

PINK Prize-Taker Onion.

When the popular *Prize-Taker Onion* was first introduced, a small proportion of the bulbs had a rich dark pink or red coloring in the skin. This was carefully bred out of the well-known yellow strain, but the originator retained a few of the finest of the large pink bulbs for a separate planting, and from long-continued selection, year after year, has been developed BURPEE'S NEW PINK PRIZE-TAKER.

Like the original *Prize-Taker*, this new variety makes a very large globe-shaped bulb from seed in a single season, but has the skin brightly colored in a rich *deep pinkish red*. The flesh is very tender, crisp, and of mild sweet flavor, fully equal in every respect to that of the original strain, differing only in the richer coloring.

Wholesale, 90 cts. per lb.;

10 lbs. or more at 80 cts. per lb.

Sweet Corn,—Burpee's WHITE EVERGREEN.

The most valuable Sweet Corn ever introduced! It is a high-bred ideal type of *Stowell's Evergreen*, so long known as the finest main-crop corn,—only it is **PURE WHITE!** From one *pure white-grained ear*, accidentally discovered six years ago, it has been developed by careful work, only the finest *white-eared* product being saved and selected each season. All the good points of a superb strain of the original *Stowell's Evergreen* have been not only retained but intensified. The quality has been so improved that we now have in **BURPEE'S WHITE EVERGREEN** the finest Sweet Corn in the world! The stalks

are of strong vigorous growth, six to seven feet high. The ears are very large and *average large*; they are uniformly well-filled to the tip (as shown in the illustration from a photograph) with long slender grains of the *purest whiteness* and most delicious sweet flavor. Market gardeners, canners, and all lovers of sugar corn have been

long looking for a *white sweet corn* as good as *Stowell's*. They can now have *Stowell's*, only it is **WHITE**,—sweet and tender, of the finest quality. When in the green state both cobs and grains are **WHITE AS SNOW**.

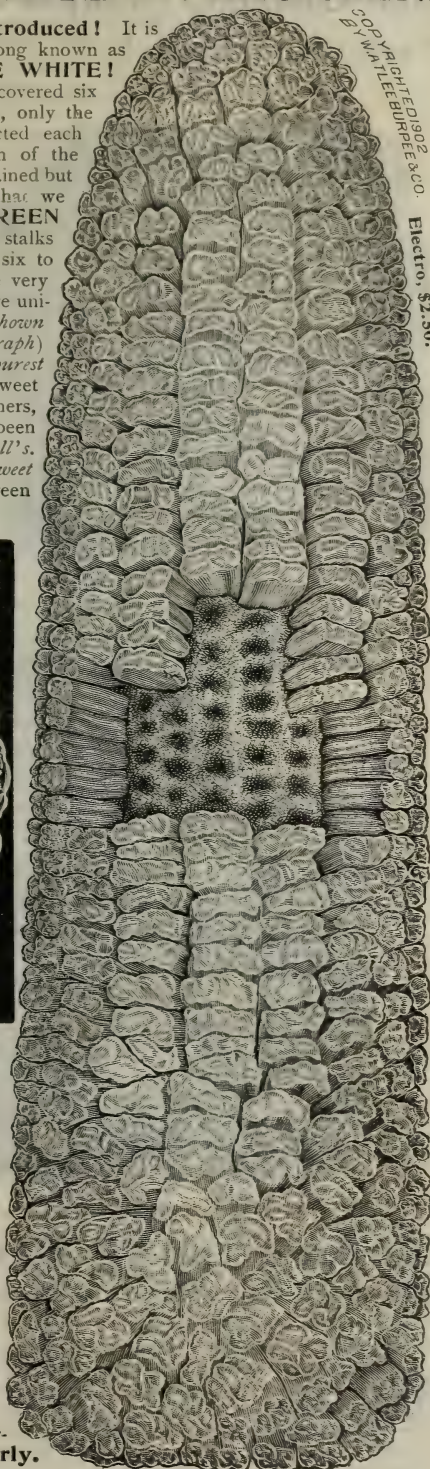

BURPEE'S NEW "WHITE EVERGREEN" SWEET CORN.
Section from a Photograph. Electro, \$1.00.

Burpee's White Evergreen Is absolutely unequalled!

First introduced last season, *exclusively by us*, and *only at retail*, this grand new type has given unqualified satisfaction. *We had hoped to have sufficient to supply all who wanted to catalogue it, but with the past unfavorable season can doubtless only supply "first comers."*

Price to seedsmen who catalogue this corn at our retail prices (to be announced later) and whose orders are accepted during October, November, or December, wholesale, \$6.00 per bushel; in lots of 10 bushels or more at \$5.75 per bushel.

We are bound to quantities only so far as accepted in writing. You should order early.

New Cabbage,—Burpee's "EARLY STONEHEAD."

Early Stonehead

has made already a host of friends. The large solid head is of very distinct growth and appearance. It is *exceptionally robust and*

Electrotype, 75 cts.

BURPEE'S EARLY STONEHEAD CABBAGE.
From Photograph taken at Fordhook.

hardy, with ample spreading foliage,—well adapted both for an early summer crop and from later planting for fall and winter. It is also specially adapted to fall planting in the Southern States for an early spring market; the heads, each "*solid as a stone*," being particularly valuable for shipping to the northern markets.

In season it is slightly later than *Burpee's Allhead Early*, but the heads grow to a larger size and will stand quite a long time before bursting. The outer leaves are large and spreading, so that the plants should be set two feet apart in the row. The plants are short-stemmed, the saucer-like circle of large grayish leaves resting on the soil.

The heads are quite large, averaging ten inches and more in diameter, broad but distinctly *rounded at the top*. The leaves are very tightly folded, ensuring heads uniformly of the *greatest possible solidity*. The leaves composing the heads, while of heavier substance than in *Allhead*, are equally as well blanched and of crisp sweet flavor. Its great solidity makes it most desirable for slicing for slaw, sourkrout, etc.

Wholesale, \$1.90 per lb.; 10 lbs. or more at \$1.75 per lb.

Electrotype,

Price \$1.25.

BURPEE'S NEW "STONEHEAD" WINTER CABBAGE,—from a Photograph taken at Fordhook.

Burpee's "LATE STONEHEAD" Cabbage. A Superb Sure-Heading Winter Cabbage of Distinct Type.

The plants are of strong sturdy growth; the head is surrounded by a spreading circle of large, rounded, blue-green leaves. These leaves *serve as a saucer* to catch light rains or heavy dews and deliver them around the stalk to the roots. The stem is short, the spreading leaves resting upon the soil, and the large solid heads are formed close to the ground. The heads are broad,—"*solid as a stone*,"—of distinctly rounded form. The leaves composing the head are tightly folded, beautifully blanched, and of mild sweet flavor. The superb hard heads are excellent for making slaw or sourkrout. From their *great solidity*, they keep well when stored for winter use.

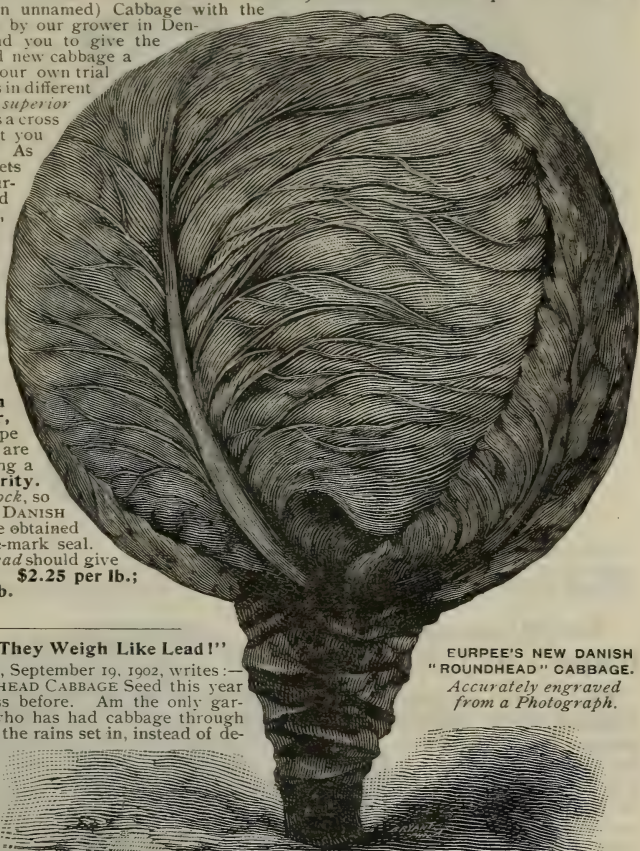

Wholesale, \$1.60 per lb.; 10 lbs. or more at \$1.50 per lb.

Burpee's "DANISH ROUNDHEAD" Cabbage.

An Earlier, Shorter-Stemmed Type of the Famous "Danish Ballhead."

As we first introduced the now famous *Danish Ballhead Cabbage* into America in 1884, our customers may imagine that we were very much interested when in the winter of 1900 we received a few pounds of seed of this new "ROUNDHEAD" (then unnamed) Cabbage with the accompanying remarks written by our grower in Denmark:—"I urgently recommend you to give the sample of a not yet introduced new cabbage a most thorough trial, both in your own trial grounds and by cabbage growers in different parts of your country. It is far superior to the Ballhead—from which it is a cross—in several respects. I expect you will find it a GREAT SUCCESS." As a result of the small trial packets which we distributed among purchasers of our original imported *Danish Ballhead*, we introduced, for the first time, this new strain, which we call BURPEE'S DANISH "ROUNDHEAD" and of which we now offer imported Danish-grown seed, crop of 1902. As a consensus of reports received we feel safe in saying that, compared with the justly popular *Ballhead*, the new ROUNDHEAD will average larger in size of heads and even harder,—"regular cannon balls in shape and hardness,"—while they are borne on shorter stems, being a week or two earlier in maturity. We contracted for the entire stock, so that true seed of this new DANISH "ROUNDHEAD" Cabbage can be obtained only under our registered trade-mark seal. Every grower of *Danish Ballhead* should give it a thorough comparative trial. \$2.25 per lb.; 10 lbs. or more at \$2.00 per lb.

BURPEE'S NEW DANISH "ROUNDHEAD" CABBAGE. Accurately engraved from a Photograph.

DANISH ROUNDHEADS,—“They Weigh Like Lead!”

Mrs. T. A. GIBBS, Drexel, Ga., September 19, 1902, writes:—I used Burpee's DANISH ROUNDHEAD CABBAGE Seed this year and never had as great success before. Am the only gardener in the whole community who has had cabbage through all the long hot drought. After the rains set in, instead of decaying, as all others did, they only grew, and now look as fresh and vigorous as if they had never encountered the intense hot dry weather. The heads are so solid and hard. The weight is astonishing; they weigh like lead. They grow well, head quickly, and in keeping qualities excel all others.

BURPEE'S "EARLY BASEBALL" CABBAGE. From a Photograph taken at Fordhook.

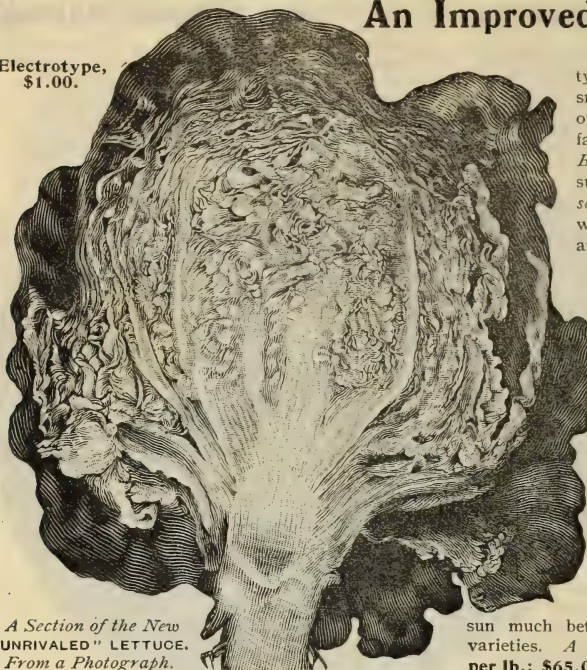

Burpee's New Cabbage,—“Early BASEBALL.”

This most distinct new extra early cabbage, for four consecutive years at FORDHOOK, has proved fully as early as *Jersey Wakefield*, while producing heads so round in form and extremely solid that we have given it the descriptive name of BURPEE'S "BASEBALL." This name aptly describes the form and great solidity of the heads. The plants are extremely dwarf, and, while well furnished with leaves, are so compact that they can be grown at a distance of only twelve inches apart in the row, hence are especially desirable for the small home garden. The plants are only eight inches high when fully grown, and the outer leaves are folded closely about the heads. The round heads are "solid as a baseball," and average four to five inches in diameter. The great hardness and extreme earliness, together with the solidity of the small ball-like heads, will make it most popular. After careful trials, in comparison with "Early Spring" and all other first-early cabbages, we regard this new "BASEBALL" as earliest of all first-early flat-head cabbages. It has been tested in all sections, and did space permit we could publish many testimonials. Wholesale, \$2.40 per lb.; 10 lbs. or more at \$2.25 per lb.

New Early or Forcing Lettuce,—UNRIVALED. An Improved "Big Boston."

Electrotype,
\$1.00.

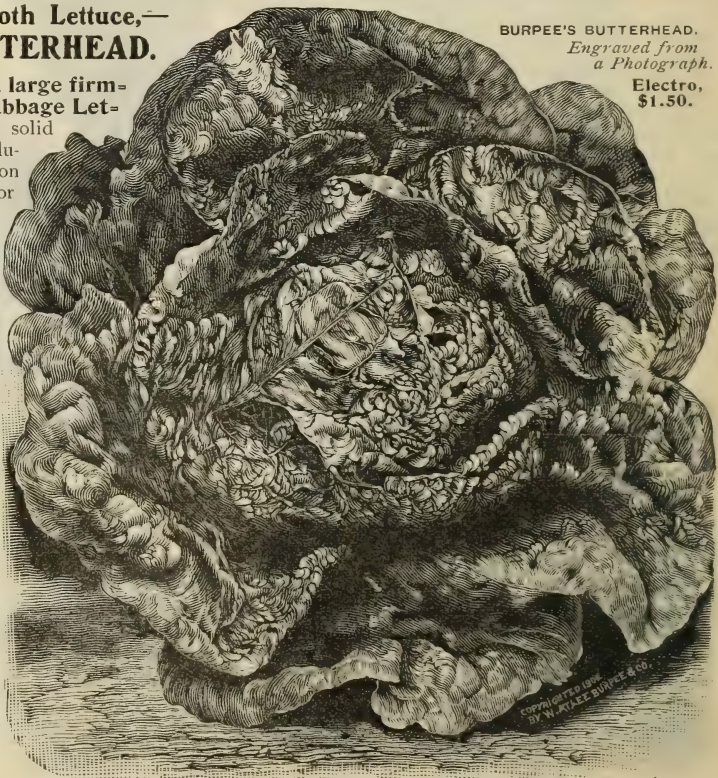

A Section of the New
"UNRIVALED" LETTUCE.
From a Photograph.

This splendid Lettuce is an improved type of the popular *Big Boston*,—with smoother and more glossy leaves. The outer leaves are entirely free from the faint brownish tinge noticeable in the *Big Boston* when grown in the warm sunlight, while the heads are more solid; they remain crisp and tender when most other sorts become tough and flabby under the hot summer sun.

UNRIVALED is a splendid all-the-year-round lettuce,—excellent for cold-frames or cool greenhouses during the winter in the North, or for the open ground in the Southern States. It may be planted in the open ground every two or three weeks from early spring until fall, and will produce crisp solid heads throughout the season. We confidently recommend it to gardeners desiring a continuous supply of crisp solid heads for the home table or for market. It can be grown at a low temperature under glass during the winter months, and at the same time will withstand the hot summer sun much better than most other solid-heading varieties. A most valuable acquisition! 75 cts. per lb.; \$65.00 per 100 lbs.

New Mammoth Lettuce,— Burpee's BUTTERHEAD.

This is an extra large firm-heading white Cabbage Lettuce. The superb solid heads are equally valuable for summer use on the home table and for market. The plants attain a diameter of twelve inches across, and the outer leaves grow well up around the large globular heads. The outer leaves are very broad, smoothly rounded, and of a light-green color. The heads are extra large, well rounded, six to seven inches across. The inner leaves, curled like a fine Savoy cabbage, are blanched to a beautiful white, of rich buttery flavor; they are particularly crisp and delicate to the taste. Wholesale: Per lb. \$1.75; 10 lbs. or more at \$1.50 per lb.

Burpee's New Mustard,—“FORDHOOK FANCY.”

The most desirable and most ornamental Mustard. It is distinct from any other variety now in cultivation. The plants are of vigorous growth, and the beautiful dark-green leaves curve outwardly like a fine ostrich plume. The edges are as thoroughly curled and laciniated as the best double curled parsley, making the leaves equally as desirable for garnishing. So attractive is the habit of growth and the feathery effect of the finely fringed leaves that this plant is quite worthy of a

place in the garden as an ornamental border plant, aside from its utility as a salad or boiling green. It is more productive than any other variety from early spring sowings, and also more stubborn in running to seed. It stands well, even during the hot summer months, while the young leaves can be cut quite as early as those of other sorts. By making several sowings a few weeks apart, a continuous growth of fresh tender leaves may be had throughout the season. Even those who do not care for mustard as a piquant salad will be delighted with the leaves of “FORDHOOK FANCY,” cooked like spinach, any time during the summer. It is even superior to the best spinach in flavor. TRY IT! Wholesale, \$1.00 per lb.; 10 lbs. or more at 90 cts. per lb.

“FORDHOOK FANCY” MUSTARD. (Electro, 90 cts.)

New Pea,—THOS. LAXTON.

The growth of the THOS. LAXTON is identical with that of *Gradus*, but the pods are a deeper richer green, square at the end instead of having a long sloping point. In the judgment of experts who have grown the two side by side, the THOS. LAXTON is even sweeter and finer in flavor than the *Gradus*, while as the large peas are of a deeper green they present a more attractive appearance on the table.

In our trials of the two varieties at FORDHOOK FARMS, where we have grown them side by side, we have noticed that the THOS. LAXTON is generally three to four days later than *Gradus*. Per bushel \$8.50; 10 bushels or more at \$8.00 per bushel.

Burpee's New “BUSH FORDHOOK” Squash.

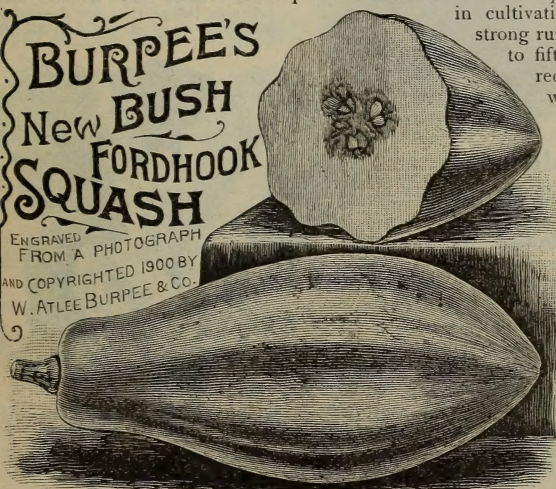

The Most Delicious-Flavored Squash for All-the-year-round.

Most of our customers are acquainted with our *Fordhook Squash*,—the best all-year-round squash in cultivation. The original Fordhook is of strong running growth, the vines growing ten to fifteen feet in length, and consequently requires considerable space. It was with great satisfaction, therefore, that two years ago we were able to offer a new strain of this finest of all squashes, having a compact bush habit. In growth it is similar to the *Early White Bush*, and so well established is its true bush habit that in a large planting the past summer we were unable to find a single running plant.

Owing to the compact bush habit the plants can be grown much more closely together, and yet they are equally prolific as the running variety. Consequently a much larger number of fruits can be obtained from a given area, while the bush habit is better adapted to the family garden and also for field culture.

The fruits are rather shorter and thicker in form than those of the running type, thicker fleshed and with a smaller seed cavity, making the bush type more desirable in every way. Our FORDHOOK SQUASH is not quite so early as the *Early White Bush*, being about a week later, but the flesh is much sweeter and better flavored than that of either the *Pattypan* or *Crookneck* type. An important advantage is that any fruits not needed for summer use can be left to ripen on the plants and gathered for winter use. They are unsurpassed for baking, frying, or making pies, while, stored in a dry place, they will keep in good condition until the following June,—thus being literally an “all-the-year-round squash.” (Electro, \$1.00.) Wholesale Price, \$1.00 per lb.; 10 lbs. or more at 90 cts. per lb.

New Egg Plant,—Burpee's "BLACK BEAUTY"

(See Specimen Painted from Nature on Front Cover of FARM ANNUAL for 1903.)

During the twenty-seven years in which we have been continuously engaged in the seed business this is the first distinct New Egg Plant of any real importance that has been introduced,—and BURPEE'S

"BLACK BEAUTY" is a novelty of most remarkable merit. It is valuable alike to the private planter and the extensive grower for market. Our fields of BLACK BEAUTY produced fruits fully as large and that were ready for use ten days to two weeks earlier than the New York Improved Purple.

For the home garden and northern locations earliness is equally as desirable as for the market gardener, and when combined with large size, fine flavor, and most attractive appearance, our friends will readily see that this new "BLACK BEAUTY" is well worthy of a place among the "trade-mark" novelties of which we are so justly proud. The plants branch freely near the ground, and grow in broad well-rounded bushes. The grand large fruits are thick, of most attractive form, as shown in the illustration. The skin is a rich lustrous purplish black,—the satin gloss and rich coloring adding greatly to the beauty of these "eggs." The intensely brilliant coloring is uniform over the whole fruit and does not fade or change to a lighter color at the blossom end. The calyx (which attaches the fruit to the stem) is bright green, contrasting finely with the dark satin skin of the fruit, and is entirely free from spines or thorns.

The fruits set most freely and develop remarkably quickly, so that the entire crop can be gathered before there is any danger of frost, while of the New York Improved Purple many fruits do not reach full size before they are destroyed by frost. Crop short. Lb. \$5.50.

Electro,
\$1.50.

NEW LARGE EARLY EGG PLANT,—
BURPEE'S "BLACK BEAUTY."

Reduced in size, from a Photograph.

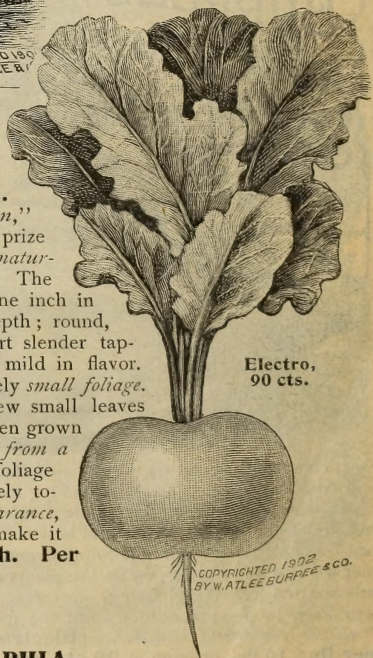

These Egg Plants would outsell the finest New York Purples even at the same time, but coming ten days to two weeks earlier they will readily bring at least double the price, so long as they hold a monopoly of the market. All experienced growers will recognize the truth of this.

New Earliest Radish,— Burpee's "HAILSTONE."

The quickest = growing Radish on record.

Thoroughly tested by thousands as Burpee's "White Button," this new extreme early Radish, now known under the prize name of HAILSTONE, has proved uniformly of the earliest maturity,—ready for the table in from fifteen to nineteen days. The radishes are regularly "turnip shaped." They measure one inch in diameter and about half an inch in depth; round, smooth, and snowy white with a short slender taproot. The flesh is solid, crisp, and mild in flavor. A most distinct feature is the extremely small foliage. A matured radish will have only a few small leaves not more than two inches in length when grown in the open ground,—see illustration from a photograph. Its unusually small foliage (allowing them to be grown so closely to-

gether), combined with extreme earliness, handsome appearance, solidity, and most superb quality, cannot fail to quickly make it the most popular first-early white turnip-radish. Per lb. 75 cts.; 10 lbs. or more at 65 cts. per lb.

90 cts.

W. ATLEE BURPEE & CO.,
Seed Growers, PHILADELPHIA.

BURPEE'S NEW "CHINESE GIANT" Red Pepper.

Double the Size of Ruby King,—this is the largest and finest mild red pepper.

Truckers planting for market will find BURPEE'S "CHINESE GIANT" the most profitable variety they ever handled. Not only is it early in ripening and immensely productive for so large a pepper, but its enormous size will cause it to sell most readily. The plants are vigorous in growth, but of stocky habit, seldom more than two feet in height. They are well blanched and thickly set with enormous fruits, which appear to hang in clusters,—so many being set on the comparatively small plants. Frequently half a dozen fruits will touch each other, as if in a single bunch; the strong growth of the plants and abundant foliage enable them to mature the large number of fruits nearly as early as the popular *Burpee's Ruby King*. The monstrous fruits are of thick blocky form and of most brilliant glossy scarlet. They grow four to five inches broad at the top and are of equal length, divided into four or more large ridges; when ripe they are indented at the blossom end. The first fruits set in a cluster of three to five at base of the plant, and are generally longer than those setting later on the upper branches, although the latter fruits are equally as broad. All are uniformly of most "enormous" size. The flesh is extremely mild,—as sweet as an apple,—and unusually thick; it makes an excellent salad sliced and served like tomatoes.

Burpee's NETTED GEM Melon.

This is the true "ROCKY FORD,"—most famous of all Musk Melons.

The most popular and finest green-fleshed Musk Melon,—“BURPEE'S NETTED GEM,”—originally introduced by us twenty-three years ago (1881), is now widely known under the name of *Rocky Ford*, as it reaches such great perfection in the favorable soil and climate of Rocky Ford, Colorado. The fine fruits from this favored section are shipped to all the large cities in the United States, where they command the highest market price. Some seedsmen offer special strains of NETTED GEM as “the *New Rocky Ford*” grown in the Rocky Ford district, but it still remains a fact that large growers of this fine melon in Colorado, Arkansas, Georgia, and other States send to us each year for our selected stock of the original NETTED GEM in preference to saving their own seed, as they know that our seed, saved from selected fruits which are grown for seed only, will give the most uniform and most densely netted fruits of finest quality.

We carefully select stock to maintain the strain at the highest possible grade, and our crops are inspected personally each year before the seed is saved; this, in connection with our extensive system of trials, insures to planters of our seed the very finest strain of this melon that can be produced. The vines are of strong healthy growth, comparatively short, and branch freely, setting a large number of fruits close to the hill. The melons are even and regular in size and form, nearly round or slightly oval. They are always finely netted and the skin is of a light golden hue when fully ripened. The flesh is light green in color, melting and luscious in flavor, and ripens close to the skin, so that there is but a very thin rind in a well-grown fruit.

To be sure of Burpee's selected seed you must order direct from us; or if you order from local merchants, see that each package bears our registered Trade Mark Green Seal if done up in paper bags; if in larger quantities, that each bag is sealed with our leaden seal.

Per lb. 60 cts.; in lots of 10 pounds, 55 cts. per lb.

Our extra selected stock is strictly A No. 1,—the best it is possible to produce.

W. ATLEE BURPEE & CO., Seed Growers,
PHILADELPHIA, PA.

New Extra Long (White Spine) Cucumber, Burpee's "FORDHOOK FAMOUS."

The most beautiful and best of all long green cucumbers. Vines produce an enormous crop, being of unusually vigorous growth. Perfectly smooth and very dark green, the handsome fruits measure twelve to seventeen inches long; they are always straight—*never turn yellow*, and are very solid. The flesh is a greenish white, firm, crisp, and of most delicious flavor. The flesh seems to be all there is of the cucumber, as the seed space

is extremely small; in fact, MR. ALÖIS LUNZER, the well-known horticultural artist who painted the plate (published in last year's catalogue), was astonished and remarked

that the cucumbers they usually purchased in New York were full of seeds with hardly any flesh, while this variety seemed to be "*all flesh and no seeds.*"

The new "FORDHOOK FAMOUS" is so **absolutely unequaled** that we can safely predict that it *will soon supersede all other types of the popular Long Green.*

Gardeners everywhere will want this **most handsome of all table cucumbers**, both because they will bring an *extra price* on market, are of the *white spine* type (never turn yellow), and because the vigorous vines are so productive.

Fordhook Famous

was "created" by Mr. A. MCINNIS, an experienced Scotch seed grower of Ontario, Canada, who, after selling us his crop, with exclusive right of introduction, wrote under date of February 13, 1901: "My new cucumber is certainly very fine—from twelve to seventeen inches long—very smooth and even size. Very productive and first-class for table use. I have sold them here on our market at 50 cents per dozen when good White Spine would not bring 20 cts. It is about seven years since the cross was made by myself. The cross was *White Spine* and *Noa's Forcing*—the latter a very beautiful cucumber, one of the best flavored that I have tasted, from which my new one has taken very much the same flavor."

Our friend, Mr. E. L. COY, of Washington County, New York, is well known as the most experienced grower of cucumbers in America. To insure against failure of our own crop, we sent a few pounds of stock seed to Mr. Coy to plant for us, and asked him to state plainly his opinion of this new cucumber.

Mr. Coy, September 4, 1901, writes: "The fruits are long, slim, and **very uniform**. When of pickle size were very dark green and handsome."

They are longer, smoother, and finer than the London Long Green, which is saying a great deal!

Those who know Mr. Coy will value this endorsement; he has been growing cucumbers extensively for more than fifty years. Again, under date of September 23, 1901,

E. L. Coy writes: "Skin *very deep green*, while the fruit is young; white when it is ripe; flesh greenish white, **firm and unusually crisp**, rivaling the famous *Parisian Pickling* in that respect. The plant is a strong grower, leaf large and of a deep-green color. The fruit is long (twelve to seventeen inches), smooth, slim, and very uniform. Owing to its large, thick, heavy leaf, it *withstood the attacks of insects* much better than any other. Its northern origin insures **great hardness and vigor.**"

Order Early, at \$2.75 per lb., or 10 lbs. for \$25.00. To be sure to have the best cucumber **Order Early.**
